FINMECCANICA TODAY

Finmeccanica is the main Italian industrial group operating globally in the aerospace, defence and security sectors, and is one of the world's leading groups in the fields of helicopters and defence electronics. It is also the European leader for satellite and space services as well as having considerable know-how and production capacity in the energy and transport fields. Headquartered in Italy and with a vast industrial base in the UK as well as important production facilities in the rest of Europe and in the USA, Finmeccanica has a workforce of more than 60,748 people, and a revenues volume of euro mil. 13,429.

Technology and innovation are the keystones of Finmeccanica's success and competitive edge. For this reason, the Group invests 1,836 billion euros a year in R&D activities, making Finmeccanica the leading Italian investor in hi-tech sectors. As far as the core business is concerned, investments amount to 17% of turnover - a percentage that is higher than some of its main competitors. A large part of R&D investment is channelled into dual technology projects, leading to significant advantages in civil applications of considerable strategic importance. To maintain its leadership in hi-tech sectors, Finmeccanica focuses on the value of its human resources, and the laboratories of its subsidiaries are staffed by around 3,000 highly specialized researchers.

FINMECCANICA IN UAE

Finmeccanica has taken on an increasingly international dimension over the past few years, with particular focus on UAE, promoting major joint ventures in the aeronautics sector and other high-tech industries, which would significantly enhance the UAE's scientific and technological capabilities as well as further cementing industrial and commercial relations with Italy.

Alenia Aermacchi has significant commitments with the advanced trainer M-346 and the basic trainer M-311 that constitute the group's first major investment in the region.

Alenia Aeronautica's C-27J, a tactical transport aircraft is generating considerable interest worldwide and throughout the UAE.

AgustaWestland, a leading player in the helicopters sector, has sold 45 AW139s to the country and has set up local joint venture for maintenance services.

SELEX Sistemi Integrati has a joint venture called Abu Dhabi Systems Integrations, active in naval (supplying on-board equipment for the new Baynunah class corvettes for the Navy) and aeronautic areas.

SELEX Communications is a leader in integrated communications, command and control systems, placed to lead the delivery of Network Enabled Capability and to support joint forces.

SELEX Galileo is promoting aircraft electronically scanned radar sensors, electronic warfare systems, electro-optical systems, target drones and sensors.

Elsag Datamat is proposing a suite of avionics support systems that cover a wide range of activities like Search and Rescue coordination, mission planning and mission debriefing.

Oto Melara is involved in Naval programs and upgrading activities along with proposals for small caliber naval weapons to local authorities involved in homeland security.

Iveco Fiat-Oto Melara Società Consortile is presenting the Armored Combat Vehicle Centaur armed with 120mm turret, and the VBM with HITFIST 30mm gun.

W.A.S.S. the underwater systems and underwater weapons leading company is involved in activities with the Armed Forces; while Finmeccanica via its subsidiaries **Telespazio** and **Thales Alenia Space** are present in space activities, satellite systems and related services.
