**THE FUTURE
IS THE QUESTION
KNOWLEDGE
IS THE ANSWER**

Finmeccanica is the main Italian industrial group operating globally in the aerospace, defence and security sectors. It is also one of the world's leading groups in the field of helicopters and defence electronics, as well as being the European leader for satellite and space services. The Finmeccanica Group is based in Italy and has an extensive industrial base in the UK as well as important production facilities in the rest of Europe and in the USA. It is a dynamic, global company which dominates the domestic markets in Italy and the UK, and excels at an international level. With a total workforce of more than 58,000 people, the Group has a production value of around 12,5 billion euros.

Technology and innovation are the keystones of Finmeccanica's success and competitive edge. For this reason, the Group invests more than 1.7 billion euros a year in R&D activities (representing 14% of value of production), making Finmeccanica the leading Italian investor in hi-tech sectors. As far as the core business is concerned, investments amount to 20% of turnover, a percentage that is higher than some of its main competitors. A large part of R&D investment is channeled into dual technology projects, leading to significant advantages in civil applications of considerable strategic importance. To maintain its leadership in hi-tech sectors, Finmeccanica focuses on the value of its human resources, and the laboratories of its subsidiaries are staffed by around 3,000 highly specialized researchers.

FINMECCANICA

Stand N. 4073, Hall 4

SELEX Sistemi Integrati

- VTS Demonstrator
- RAT 31 DL
- Optronics Sensor
- ATC Secondary Radar

**PRODUCTS
ON DISPLAY**
