FINMECCANICA TODAY

Finmeccanica is the main Italian industrial group operating globally in the aerospace, defence and security sectors, and is one of the world's leading groups in the fields of helicopters and defence electronics. It is also the European leader for satellite and space services as well as having considerable know-how and production capacity in the energy and transport fields. Headquartered in Italy and with a vast industrial base in the UK as well as important production facilities in the rest of Europe and in the USA, Finmeccanica has a workforce of more than 70,000 people, and a revenues volume of euro mil. 13,429.

Technology and innovation are the keystones of Finmeccanica's success and competitive edge. For this reason, the Group invests 1,836 billion euros a year in R&D activities, making Finmeccanica the leading Italian investor in hi-tech sectors. As far as the core business is concerned, investments amount to 20% of turnover - a percentage that is higher than some of its main competitors. A large part of R&D investment is channelled into dual technology projects, leading to significant advantages in civil applications of considerable strategic importance. To maintain its leadership in hi-tech sectors, Finmeccanica focuses on the value of its human resources, and the laboratories of its subsidiaries are staffed by around 3,000 highly specialized researchers.

FINMECCANICA IN INDIA

Finmeccanica is increasing its international presence with a particular focus on India where the Group is promoting its most important platforms and systems, as well as enlarging the company's industrial and technological footprint via successful collaborations established with PSUs and private companies.

AgustaWestland, is present in India since the 1970's with the Sea King and commercial helicopter (AW 139 and AW 109). The company is a front runner in the major programs in the country. Industrial cooperation is a key element of its presence in India.

Alenia Aeronautica is promoting the C-27J, the most advanced medium transport aircraft. Engineering and tooling activities have been transferred to primary Indian companies.

SELEX Sistemi Integrati has a leading position in Air Traffic Management Systems, with a long standing collaboration with BEL. Selex Sistemi Integrati is promoting its key capabilities (C4I, VTMS, Naval Combat Systems, Coastal protection, Homeland Security and Radars).

DRS is a US company recently acquired by Finmeccanica. Its ruggedized processing and display devices and technologies, considered the best available in the market, are being proposed to the Indian forces for Battle Management and C4I Systems.

SELEX Communications has long term relations with all the military services. The company is promoting the Tactical Communication Systems and TETRA applications. Collaborations with BEL and other Indian industries have been in place for years now.

SELEX GALILEO is promoting aircraft electronically scanned radar sensors, electronic warfare systems, target drones, fire control systems for Air, Naval and Land applications. SELEX GALILEO has been present in India since many years.

Oto Melara is present in India since the 1990's with the 76 mm Naval Gun, produced under license by BHEL. The company is promoting the 127 mm naval gun representing the state-of-the-art large calibre naval gun.

WASS is involved in several underwater programs with the Indian Navy, in particular with its Black Shark heavy weight torpedo and torpedoes countermeasures. WASS has been present in the country since the 1970's with its light weight torpedoes A244S.

Elsag Datamat, has recently started to market solutions for law enforcement applications in India. Its unique plate reader systems as well as mobile check points and other worldwide leading technologies are under evaluation by the Indian Police Forces.
