FINMECCANICA TODAY

Finmeccanica is a global player operating in the aerospace, defence and security sectors, and is one of the world's leading groups in the fields of helicopters and defence electronics. It is also the European leader for satellite and space services as well as having considerable know-how and production capacity in the energy and transport fields. Headquartered in Italy and with a vast industrial base in Europe and the United States Finmeccanica has a workforce of more than 73,000 people, and revenues of 15,037mil. euros. At sixteen major sites from Edinburgh to Portsmouth, Finmeccanica and its operating companies in the UK collectively employ more than 10,000 highly skilled people and have annual sales in excess of 2 billion pounds.

Technology and innovation are the keystones of Finmeccanica's success and competitive edge. For this reason, the Group invests 1,809 billion euros a year in R&D activities, making Finmeccanica the leading Italian investor in hi-tech sectors. As far as the core business is concerned, investments amount to 20% of turnover - a percentage that is higher than some of its main competitors. A large part of R&D investment is channelled into dual technology projects, leading to significant advantages in civil applications of considerable strategic importance. To maintain its leadership in hi-tech sectors, Finmeccanica focuses on the value of its human resources, and the laboratories of its subsidiaries are staffed by around 3,000 highly specialized researchers.

Towards a safer world

As governments develop national security strategies to protect society against an increasingly wide range of threats, risks and instabilities, so too Finmeccanica is deploying its proven technology and expertise to deliver leading edge capability for increasingly complex military and non-military domains.

Finmeccanica offers comprehensive integrated and networked solutions in security and resilience for air, sea or land in all sectors such as ports, airports, railway and border protection. Finmeccanica's technology and solutions also offer protection for Critical national Infrastructures (CNI), and against Chemical, Biological, Radiological and Nuclear (CBRN) threats. In the military domain, Finmeccanica's group companies have invested in state-of-the-art technology, systems and sub systems integration, programme management and engineering expertise in order to provide bespoke solutions to new complex Battlespace requirements presented by modern operations.

Finmeccanica works closely with its customers to develop innovative, reliable and cost effective solutions across all of the sectors in which it operates.

Finmeccanica considers itself to be an enduring partner, developing agile and responsive solutions tailored to the needs of the end user and providing capability through life. This approach is applied throughout the supply chain as we build long term partnerships aimed at maintaining a competitive edge. We are committed to ensure our customers know they are not alone, we provide support and assistance at any operational level ensuring the capability remains available.

With operations in Italy, the UK and the USA and deployed solutions across the globe, Finmeccanica is able to support the evolving needs of its clients worldwide.
